\* In 2011, the European Union Labour Force Survey (EU-LFS) included an ad hoc module (AHM) on employment of disabled people. The module consisted of 11 variables dealing with:

- Health problems and difficulties in basic activities;
- Limitations in work caused by health problems/difficulties in basic activities;
- Special assistance needed or used by people with health problems/difficulties in basic activities;
- Limitation in work because of other reasons.

On the basis of how the module was operationalised, the following two main definitions for disability were considered for presenting the results:

- Disabled persons = People having a basic activity difficulty (such as seeing, hearing, walking, communicating);
- Disabled persons = People having a work limitation caused by a longstanding health condition and/or a basic activity difficulty.
